Right, Ken Rose, sorry. I'm back online now. Where do I need to jump in on the budget papers request?

Linda, I checked all involved state agencies on the air testing piece of this letter per our conversation yesterday. Here's the upshot:

EPA has not done any air sampling or testing re: MCHM per Alice Chow's confirmation. DEP indicates they have reached out to EPA regarding air but I do not know where the request was made or what the status is.

WVDHHR - Bureau for Public Health indicates they have done no air testing or sampling re: MCHM.

National Guard and WV Military Affairs and Public Safety indicate they do not have the capacity to do air testing.

WVDEP says they have dispatched inspectors from their Division of Air Quality that are on the states TAP "rapid response team"

and their role basically is to sniff for odors. They take odor training as part of their jobs. They do not do any air quality testing at the schools they visit. DEP says they've had discussions about air testing at schools but it was determined their DAQ does not have the proper instrumentation to conduct the testing for an organic such as MCHM. DEP spokesman indicated they had reached out to EPA on this.

Hi Linda and Mark-

New letter from Senator Rockefeller if you have not already seen it. We will need to discuss follow up.
